Product Obsolescence Notice

Feb. 21, 2013

Dear Valued Customer,

Giga-tronics appreciates and values its business relationship with you and we look forward to your continued interest in our products and services.

This letter is sent to advise you that Giga-tronics will discontinue manufacturing the "A" model USB Power Sensors, with model numbers GT-8551A, GT-8552A, GT-8553A, GT-8554A, GT-8555A and GT-8888A, effective immediately. This product line is being replaced with the new "B" model USB Power Sensors, with model numbers GT-8551B, GT-8552B, GT-8553B, GT-8554B and GT-8555B. Performance specifications remain the same, but the software has improved. "A" model USB Power Sensors will operate with the new "B" model software. The GT-8551B replaces both the GT-8551A and GT-8888A models.

Giga-tronics strives to provide the highest levels of service and support to all our customers. Our intent is to provide service and support for the "A" model USB Power Sensors, including at our option, providing replacement hardware and/or software.

Please note:

- The new "B" model USB Power Sensor's performance equals or exceeds the "A" model performance.
- The "B" model power sensor software includes many new features and capabilities. More supportable, more robust, backward compatible.
- Old "A" model hardware will work with the new "B" model software.

To best serve you, all inquiries and requests should be directed through your normal sales channels and contacts.

Sincerely,
Leonard Dickstein
Marketing Manager
